2. Analyze and provide input for each building based on survey results
  - a. There appeared to be much pride with the teachers and what they are doing
  - b. A notable fluctuation between students and teachers in some areas, such as; teachers adjusting teaching, report cards, TAG Program, After School Program, counselors meeting student needs, etc.

\*Several members chimed in on the intrinsic need to make all students feel like they are part of our school community and look forward to doing many activities together.

\*Andy Hotek brought up that there is a need for our "school community", to have a place for every student, so all of them feel like they belong.
