

As you read your chosen book, think about the following and be prepared to share at our Sept. meeting:

1. What ideas align/don't align with our understanding of standards-based education?
2. What ideas are important to share with the entire Oskaloosa staff to ensure understanding of standards-based education?
3. What ideas do you disagree with (or do you think many members of the staff will disagree with)?
4. What ideas do you agree with (or do you think many members of the staff will agree with)?
5. If you were to choose three ideas related to effective grading practices from your book that you think are most important for student achievement, what would they be?
6. What other main points from your book do think are important for us to consider as we move forward with our process?
